

French Refined Limestone

The close-grained texture of the Refined limestone comes from beds laid down during the Jurassic period some 90 million years ago.

Although this stone has been used locally for centuries in France, its qualities have been more widely appreciated only recently, largely owing to the introduction of modern cutting equipment. A stone of light golden-brown tones on a cream, sometimes pink, background, this is a classic understated limestone suited equally well to traditional and modern design schemes.

Product Specifications:

Length: 40 to 60 cm
Slab Available: Yes
Thickness: 2 cm
Width: 40 to 60 cm
Finishes: Honed

Product Applications:

Bathrooms	Kitchens
Commercial	Residential
Exterior Warm Climates (not frost resistant)	Stairs
Floors	Swimmingpool Surround
Hallways	Walls
Interior
