

Crackle Glaze Tiles with Border

In 1985 Paris Ceramics introduced the original crackle glaze tile, AX. It has long since proved to be the most popular tile for exploring countless decorative possibilities. AX is an adaptable tile, equally suited to both traditional and modern applications.

Paris Ceramics artists use a variety of decorating techniques to achieve a diverse range of design styles. The tiles shown here are produced by painting oxides directly onto the unfired glazed, a technique known as maiolica, employed by the artists who produced classic delftware.
